

spgprints®

Experts in
ink technology.

Better performance with SPGPrints' digital textile inks.

When outstanding results matter, rely on SPGPrints' ink technology. No matter which print head is used. SPGPrints' inks are specially formulated to deliver optimum performance and unattended printing, on all leading printing systems and fabrics employed in textiles today.

In-house development and production allow us to offer inks with unrivalled quality and runnability at competitive prices. SPGPrints' inks guarantee unattended printing without nozzle blockages or print head failures.

Digital inks for all major industrial print heads and fabrics

Besides the inks for PIKE (Reactive) and JAVELIN (Reactive, Acid and Sublimation) we produce inks for all different types of industrial print heads and fabrics. For scanning printers, equipped with Kyocera print heads, we offer our NEBULA digital inks range: Reactive HD, Acid HD, Disperse and Sublimation. For single-pass printers with Kyocera print heads, we have developed our QUASAR digital inks collection of Reactive HD inks.

Find out how SPGPrints' inks enhance the productivity of your printer

Our specialists are pleased to advice you about the possibilities of our digital inks for your business. Please contact us to find out if our inks run on your printer.

Global network assuring the highest levels of support

Thanks to our global presence, we understand local market needs and leverage our strengths through an international network of global manufacturing facilities and a distribution foothold in more than 100 countries. We set industry standards in technology, product performance and service.
